

Bearing & Tool Centre – Leading Supplier of wide range all types of [Measuring Testing Instruments in Ahmedabad](#). Being our esteem customers you can avail the instruments at best price even on rental basis. Our supplied range of **measuring testing instruments** are meticulously procured from the leading manufacturer having huge years of experience in this domain and these instruments are manufactured using the premium quality basic components by means of the most advanced technology machinery in adherence with the set international quality standards.

### **Supplier of Dimensional Measuring instruments**

Being a leading [Supplier of Dimensional Measuring instruments](#), we are offering these instruments at best price range to customers and even the customers can avail the instruments at rent also. These measuring instrument is recognized as a gauge which is used in metalworking or metrology for determining the height of objects. Our reputed vendors who manufacture the **Dimensional Measuring instruments** with the support of diligent workforce using quality grade stainless steel. You can avail these gauges at different sizes and specifications as per your requirements.

### **Thread and Plain Plug & Ring Gauges**

We are leading [Thread and Plain Plug & Ring Gauges Supplier](#) in Ahmedabad. We are offering the Thread and Plain Plug & Ring Gauges of leading brand **Mitutoyo** and other brands. You can avail these product at best affordable price. Our range of the Thread and Plain Plug & Ring Gauges are developed from supreme quality raw material, as per the set industry standards. These gauges are hugely demanded by the customers for their unique attributes and their capacity testers are durable, cost effectiveness and low maintenance. We are offering these testers at most reasonable prices. Many of these gauges are readily accessible from our complete stock. We are supplying these plain plug and ring gauges, both parallel and taper to British and International Standards.

### **Supplier of NDT / Testing Instruments**

Bearing & Tool Centre – Leading [Supplier of NDT / Testing Instruments](#) which are used in diverse industrial application and the testing of the products used for the same, hardly have techniques that are non-destructive in nature. Having years of experience in this domain we are backed by the high technologies and modern machinery to offer you with international standard products. The supplied range of **NDT testing instruments** are manufactured by analysing the state of innovation with the real world experience. These instruments are having the ability to work with the accuracy despite of doing any harm to the material sample. They designed to work efficiently with all types of material and are outstanding in performance. The custom-built equipment has dynamic capabilities to test the material with the 100% result accuracy.

### **Micrometer Supplier**

Backed with the team of experienced experts and vendors who are engaged in manufacturing the [micrometer](#) with a perfect blend of latest technologies. These offered micrometer is used for measuring and marking the thickness of paper, board and plastic.

These products are engineered by our adroit professionals utilizing the advanced technology as it has superior strength and gives accurate dimensional notations. These **micrometers** are hugely demanded in the market owing to its features like resistant against heat, long service life and superior performance. The supplied instrument is accurately engineered in acquiescence with international quality standards with the assistance of pioneering technology using superior quality material. Our respected customers can gain this instrument from us at the most affordable price.

### **Hardness Testers Supplier**

Bearing & Tool Centre is leading [Hardness Testers Supplier](#) and authorized dealer. We trademark as providing the highest grade of **Hardness Testing Machines** such as **Rockwell Hardness Tester, Brinell Hardness Tester, Vickers Hardness Tester & Portable Hardness Tester** at the best affordable price. Being our esteem customers you can avail these testers at the most reliable yet cost-effective NDT inspection, quality assurance, and control related equipment and solutions to our highly valued customers with our variety of products like **portable hardness testers, case depth gauge, portable spectrometer, portable microscope, ultrasonic thickness gauge, coating thickness gauge and crack depth gauge**, etc.

### **Anemo Meters Supplier**

We are distinguished [Anemometer Supplier in Ahmedabad](#). The offered instrument Anemometer is a device which is used to measure the air velocity and it can easily measure the minimum and maximum values facilitates efficient measurements at ventilators grilles and disc outlets. The air conditioners air can be reliably checked with the help of the Anemometer.

### **Ultrasonic Thickness Gauge Supplier**

Bearing & Tool Centre reputed [Ultrasonic Thickness Gauge Supplier in Ahmedabad](#), offering at most affordable rates. These offered instruments are used for accurate measurement of different materials or parts in industrial production, as well as monitoring pipelines and pressure vessels of production equipment and corrosion degree of various parts in use. It can also be widely used in manufacturing, metal processing, commodity inspection and other testing areas. Any material that allows ultrasonic to transmit at a constant speed and that is distinguishable from waves reflected from the back side is applicable to this instrument. These are low-cost measuring devices, which are easily operated, portable and convenient to handle

### **Coating Thickness Gauge Supplier**

Pioneers in the industry, we are reputed [Coating Thickness Gauge Supplier](#) in Ahmedabad. These offered range of **Coating Thickness Gauges** are also referred as a paint meter which is used to measure dry film thickness. To check the dry film thickness is probably the most critical measurement in the coatings industry due to its impact on the coating process, quality and cost. Even these gauges are used for measuring the

thickness and corrosion of pressure vessels, chemical equipment, boilers, oil storage tanks, etc. in diverse industries.

### **PH Meters Supplier**

Empowered with the best vendors, we are reputed [Ph meters Supplier](#) in Ahmedabad, which is recognized as an electric device used to measure hydrogen ion activity in solutions-in other words, this instrument measure acidity/ alkalinity of a solution. These offered range of ph meters are mainly used in the water application and it is manufactured using the latest engineering techniques and qualitative raw materials. In addition to this, our instruments are also stored in the best-in-class warehousing unit before their final dispatch to the customer's premises.
